# BREACHING MODULES

#1

**MODULE NUMBER 1**

*MEC2 Prod nr: 30011*

- Advanced mechanical breaching
- Basic mechanical breaching
- Hydraulic breaching
- Inward and outward training

This module authentically replicates a real door. With a variation of locking points this module is suitable for both basic and advanced mechanical training. Can quickly be re-locked for training with efficiency.

This module is fundamental for mechanical breaching courses.

#2

**MODULE NUMBER 2**

*MUT4 Prod nr: 30015*

- Mechanical breaching
- Hydraulic breaching
- Shotgun breaching
- Explosive breaching
  - Pushing charges
  - Cutting charges
- Rotary power tool cutting
- Thermal cutting

The multifunctional door provides breaching made against the head lock, in or outward training. Developed for training facilities where different breaching options are required.

The head lock can be replaced and adapted for the chosen breaching method.

#3

**MODULE NUMBER 3**

*EXP2 Prod nr: 30043*

- Explosive breaching
  - Cutting charges on wood
  - Tamping charges on metal
  - Pushing charges on Hardox
- Rotary cutting
- Chainsaw
- Thermal

Three different ways to train with explosive charges. Made to simulate wooden, plastic or steel/security doors. The Hardox plate provides very fast and easy repetition when efficiency is required without any need of changing spare parts.

This module also provides breaching with rotary tools, chainsaws or thermal cutting.

#4

**MODULE NUMBER 4**

*GTF Prod nr: 30016*

- Break N Rake
- Explosive breaching
- Chainsaw cutting
- Sniper training

The glass training module offers training with different types of glass. Plastic sheets, laminated glass or floating glass can be applied in different layers to simulate different windows.

The design makes it quick and easy to switch the chosen window – for an efficient training.

#5

**MODULE NUMBER 5**

*DWF Prod nr: 30027*

- Mechanical breaching
- Hydraulic breaching
- Explosive breaching

The module can be adjusted to fit different type of real doors. Install brackets for the possibility to also mount real windows.

The wood frames give a strong and realistic installation.

#6

**MODULE NUMBER 6**

*SDM*

- Hydraulic breaching
- Explosive breaching
- Assisted mechanical breaching

The ship door is made for maritime breaching training. Can quickly be re-locked for training with efficiency.

Breach with your hydraulic equipment and create space for them by using mechanical tools.

Train different explosive methods.
